Hello,

The US EPA has prepared the following information resource:

EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.
EPA Hotline: 844-607-9700 (toll-free)

Comments:

Please consider using industrial strength zeolites. They attract toxins and trap them. They were used to clean up Chernobyl. The Canadian product is best. If you put them in filters you can remove them from the river. At the very least however they will hold the toxins they trap.
Let's turn this around and make this one of our country's healthiest rivers!
